A Marq of Distinction

SC Global's The Marq on Paterson Hill is set to live up to its name, setting new benchmarks in the high-end luxury residential market with its evocative design and unrivalled location.

SC Global's 2007 Luxury Collection is as original as it is authentic, luxurious as it is exquisite.

SC Global Developments achieves yet another industry first with its latest and most exclusive development – The Marq on Paterson Hill. Best described as 'mansions in the sky', this freehold development effectively replicates the space, exclusivity and privacy of high-end bungalow living within the setting of an exquisite resort-style high-rise condominium.

With other upmarket properties like The Ladyhill and BLVD to its credit, Singapore's leading developer of luxury homes continues to deliver uncompromised quality and perfection.

For The Marq, that means grand 6.5-metre double volume spaces for the main living, dining and kitchen areas, a resort-style steam room in every unit and a 15-metre lap pool cantilevered outside the building in every apartment on every floor. Not only a remarkable architectural feat, but also a first for Singapore, and a global design innovation.

This will make The Marq the only residence in Singapore to offer the visual tranquillity of an infinity pool set against the glittering skyline of Orchard Road, all from the comfort of your own private living room. The building itself

will take on an iconic presence on the Orchard Road Skyline when its lap pools are illuminated after sunset, creating a spectacular view for the streets below.

Along with its unrivalled views and fine quality fittings, residents can expect premium concierge services and luxurious amenities on par with five star resorts. Defying all conventional notions of luxury living, The Marq on Paterson Hill is a true mark of distinction.
